CSCW Systems

1. Real-Word Project Application [Equipoise Project Descriptions](#)

2. Palm OS: <http://www.palmos.com>

Software for handheld computers and applications. A Palm OS emulator can be downloaded. Then, educational applications can be downloaded for evaluation and design. Two projects provide three kinds of software: [NetCalc Software](#) and [WHIRL Software](#)

3. Blackboard: <http://www.blackboard.net>

Blackboard offers a complete suite of enterprise software products and services that power e-Education programs in our primary markets. Blackboard solutions deliver the promise of the Internet for online teaching and learning, campus communities, campus commerce services, and integration of Web-enabled student services and back office systems.

4. BSCW (Basic Support for Cooperative Work): <http://bscw.gmd.de/>

BSCW (Basic Support for Cooperative Work) enables collaboration over the Web. BSCW is a 'shared workspace' system which supports document upload, event notification, group management and much more. To access a workspace you only need a standard Web browser.

5. CommunityZero: <http://www.communityzero.com/>

CommunityZero™ is an interactive website that allows a group of people to communicate and exchange information over the Internet in their own private and secure **area**. Within each **area**, called an online community, participants are provided access to a suite of powerful tools that enable a group to effectively get organized, share knowledge and communicate.

6. CuseeMe: <http://www.fvc.com/>

This is a web application package that allows groups to meet online, enabling collaboration

between dispersed teams. Using web conferencing groups can potentially see, hear, text chat, present, and share information in a collaborative manner.

7. Cybozu Office 3: <http://cybozu.com/>

Share360 enables your office to collaborate on tasks, projects, meetings, ideas or any office initiative easily and efficiently all in one place. The applications are accessible through a web browser, so no client installations are needed. (60-day free evaluation available for download.)

8. DIVE (Distributed Interactive **Virtual** Environment): <http://www.sics.se/dive>

The Distributed Interactive **Virtual** Environment (DIVE) is an internet-based multi-user VR system where participants navigate in 3D **space** and see, meet and interact with other users and applications. DIVE supports the development of **virtual** environments, user interfaces and applications based on shared 3D synthetic environments. DIVE is especially tuned to multi-user applications, where several networked participants interact over a network.

9. GROOVE: Collaborative Groupware System: <http://www.groove.net>

Groove Workspaces enable businesses and individuals to simplify document exchange and reduce the cost of coordination. It's integrated with Microsoft Office, Email, and Instant Messaging. It allows for file-sharing and work on- or offline.

10. LearnLinc: <http://www.ilinc.com/>

iLinc is Web conferencing and collaboration software that enables people to communicate more effectively and efficiently via the Internet. iLinc enables you to enjoy the same interaction as meeting in-person while eliminating the tremendous amounts of travel, money and time associated with face-to-face meetings.

11. **NetMeeting**: <http://www.microsoft.com/windows/netmeeting>

NetMeeting software allows users to share ideas, information, and applications using video or audio. Send and receive real-time video images using Windows-compatible equipment, use a video camera to instantly view items, and ensure that people can hear each other by adjusting an automatic microphone's sensitivity level setting.

12. Onlive Traveler (VRML Browser): <http://www.digitalspace.com/traveler/>

Digital **Space** Traveler supports communities of users using their own voices to speak through 3D avatars that lip synch and blend sound together. Traveler permits up to 16 people in one **virtual space** to talk or even share music.

13. TeamCenter: <http://www.eds.com/products/plm/teamcenter/proj.shtml>

TeamCenter allows globally dispersed users to simultaneously view and interact with the same instantaneously updated project information, including project schedules, threaded discussions, notebooks, and collaborative documents. Teamcenter Project lets your teams break down complex projects into specific tasks, assign tasks to designated resources, and manage the workloads of given resources.

14. Web4M <http://www.ditium.com/ditium-products/jdhtech.html>

Web-4M provides a comprehensive collaboration and learning environment. It is an integrated suite of peer-to-peer, multi-user, and groupware tools that deliver information in real time (Just-In-Time). Web-4M features browser accessible local and global communication.

15. Whiteboard: <http://www.smarttech.com/>

The SMART Board interactive whiteboard transforms your **space** into an interactive working, training, and learning environment. Using a projector, computer and whiteboard, everything done on your computer can be captured and displayed.
